

Real-Life Use Cases For Diabetologists

Diabetes Follow-Up

Track HbA1c trends, review medications, update prescriptions instantly.

Complication Monitoring

Monitor neuropathy, nephropathy, renal investigations, and patient history.

Diet Counselling

Add meal plans, track nutrition goals, and monitor adherence.

Integration & Ecosystem

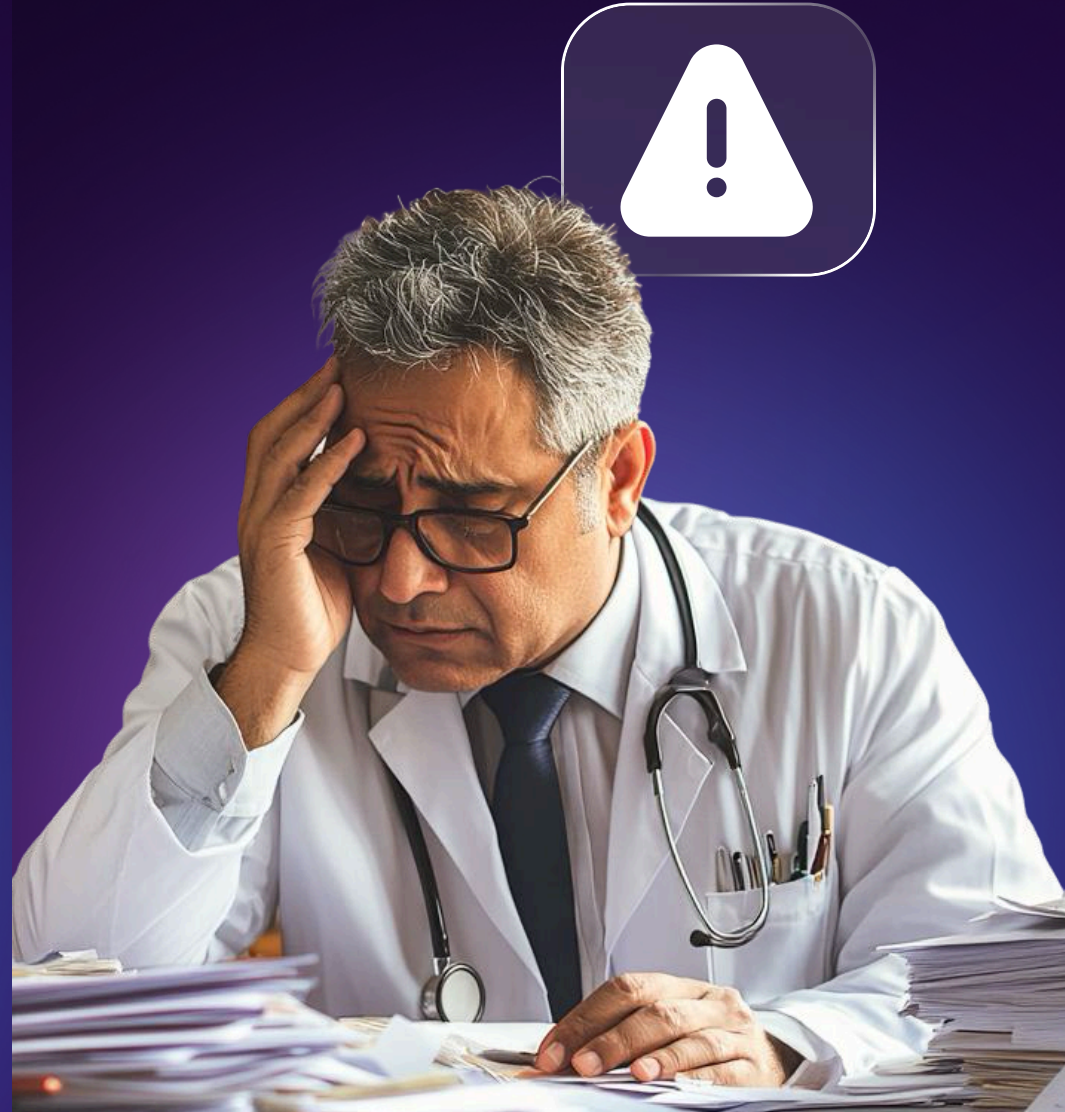

- Lab Integrations
- Appointments
- Pharmacy workflows
- Billing
- WhatsApp communication
- AI documentation support

Eka Care's AI-based tool has been user-friendly and time-saving, with smart suggestions for symptoms, diagnoses, and medicines. The mobile app and broadcast messaging feature have been particularly impressive. The Eka Care team has been consistently available and prompt in providing support whenever required.

Dr. Pramod D. Gandhi
Endocrinologist & Diabetologist
Gandhi Hospital, Nagpur

Common Challenges Faced by Diabetologists

- Managing long-term patient history across visits.
- Tracking HbA1c trends and investigations over time.
- Monitoring BP, weight, BMI, and complications.
- Handling medication adjustments frequently.
- Following up with patients who miss reviews.
- Managing high OPD volume efficiently.
- Coordinating diet, lifestyle, and medication counselling.
- Maintaining structured records for chronic patients.
- Tracking adherence and outcomes.
