# Why **Diabetes Care** Needs More Than a Regular CMS

Most diabetes clinics don't struggle because of lack of knowledge, they struggle because there is no system to manage continuity.

## What Happens in Most Clinics Today

- **Follow-ups depend on memory**  
Patients don't return on time - and no one tracks it.
- **No clear visibility of patient progress**  
HbA1c and glucose values exist, but trends are not easily seen.
- **Complications are detected late**  
Foot, eye, renal risks often go unnoticed until advanced stages.
- **No structured clinical assessment**  
Every consultation varies - important checks may be skipped.
- **Data is scattered across visits**  
No single view of the patient's complete diabetes journey.

## MocDoc Changes This

From

👉 Managing diabetes as individual visits

To

👉 Managing diabetes as a continuous care program

Because diabetes care is not about one consultation - it's about what happens between visits.

# MocDoc Brings Structure to Diabetes Care

Instead of managing diabetes as isolated visits, MocDoc enables a structured, continuous care approach across every patient interaction.

## A Simple, Structured Diabetes Care

1

### Capture the Complete Clinical Picture

Structured case sheets ensure every consultation is consistent, complete, and clinically aligned.

2

### Track Patient Progress Across Visits

Record vitals like HbA1c, glucose, BP, and weight over time creating a clear patient timeline.

3

### Identify Trends, Not Just Readings

Visualize patterns and progression to make informed clinical decisions.

4

### Ensure Timely Follow-Ups

Automatically track review dates and ensure no patient is lost to follow-up.

With MocDoc, diabetes care becomes structured, trackable, and continuous.

# Structured **Clinical Assessment** Built Into Your Diabetes Workflow

As part of the structured diabetes care flow, MocDoc ensures every consultation is guided, consistent, and clinically complete.

## Guided Clinical Workflow

Organized consultation flow from history to evaluation covering known illness, social history, family history, vitals, past history, and treatment history.

**👉 The system guides your consultation, not your memory.**

## Organ System Examination

Structured examination of all major systems with symptoms, findings, and clinical notes

**👉 Assess every system in every visit.**

## Complication and Risk Evaluation

Evaluate for retinopathy, neuropathy, nephropathy, and other complications with a dedicated diabetic evaluation section.

**👉 Detect complications early, not after progression.**

## Built-In Clinical Intelligence

Integrated risk calculators like IDRS and FIB-4 help identify high-risk patients instantly.

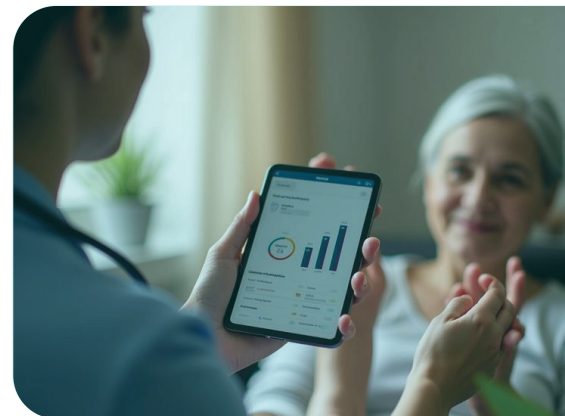

**👉 Identify high-risk patients instantly.**

## Context-Aware Data Capture

Gender-specific sections such as menstrual history are shown only when relevant.

**👉 Capture only what matters, when it matters.**

A consultation system that ensures clinical completeness every single time.

# Understand Patient Progress Through Clear Trends and Data

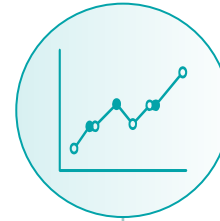

After every consultation, MocDoc helps you track patient data over time through structured vitals, reports, and trend charts - giving you better visibility into patient progression.

## Structured Vital Tracking

Capture key diabetes parameters at every visit including HbA1c, fasting and postprandial glucose, blood pressure, weight, and renal markers.

**Each visit builds a continuous patient record.**

## Trend-Based Visibility

View graphical trends for HbA1c, glucose levels, and other investigations through the patient dashboard and reports.

**Easily observe how values change across visits.**

## Patient Timeline Across

Maintain a chronological view of patient data, allowing you to compare current and past values in one place.

**No need to refer to multiple records manually.**

## Integrated Lab and Report Access

Access investigation results alongside patient vitals and history for better clinical context

**All relevant data is available together when needed.**

Clear trends. Better understanding. More confident decisions.

# Never Lose a Patient to Follow-Up

MocDoc converts every review date into a trackable follow-up task, ensuring your team actively manages patient continuity.

## Set Review Dates During Consultation

Capture next visit dates directly in the case sheet, billing screen, or patient dashboard

**Every follow-up is recorded at the source.**

## Central Reminder Management Screen

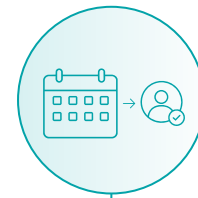

View all follow-ups in one place with clear status indicators and patient details

**No need to track follow-ups manually.**

## Task-Based Follow-Up Tracking

Each reminder becomes a task that can be updated, rescheduled, and managed by your team

**Follow-ups are actively tracked, not passively noted.**

## Convert Tasks into Appointments

Easily follow up with patients and convert pending tasks into confirmed visits.

**Ensure patients return on time for care.**

Clear trends. Better understanding. More confident decisions.

# Why MocDoc?

HIPAA, ISO, GDPR, & SOC II Compliance

Highly Secured & Encrypted
