

# ADVANCED AI-POWERED EMR & HOSPITAL MANAGEMENT

For Clinics • Polyclinics • Hospitals

Built for speed, accuracy,  
compliance, and effortless  
patient care.

Works on:

Desktop

iPad

Tablet

For every specialty with  
specialty specific features:

Physicians • Diabetologists • Orthopaedicians •  
Gynaecologists • Paediatricians •  
Gastroenterologists • Cardiologists • Neurologists •  
Dentists • Surgeons • and more.

# A Smarter Way to Run Your Clinic & Hospital

TatvaPractice brings together everything a modern healthcare setup needs: prescriptions, workflows, billing, patient engagement, and AI automation into one smooth, intelligent platform.

## Why Doctors Prefer TatvaPractice

Faster consultations with AI assistance

Consistent, error-free prescriptions

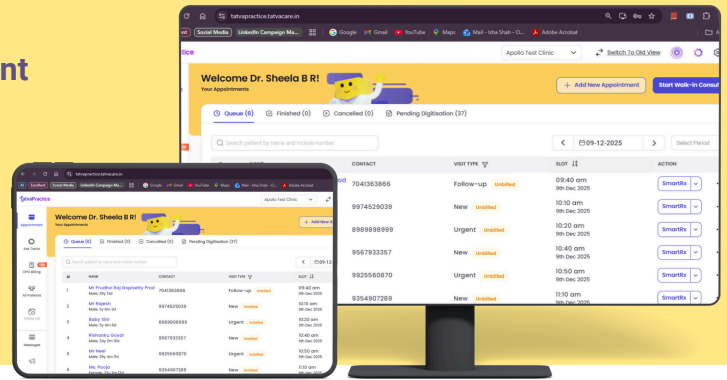

Automated follow-ups & reminders

Hospital-grade security & ABDM compliant

Works effortlessly across OPD & IPD

### Digital Prescription

Customisable, multilingual digital prescriptions with auto-fetched vitals and clean, structured layouts.

### VoiceRx

Hands-free medical-grade dictation that turns speech into accurate digital prescriptions, history and notes instantly.

### SnapRx

A photo-to-digital feature that converts handwritten Rx into a clean, mapped digital Rx instantly. Perfect for fast-paced OPDs.

### SmartSync CVT

A handwritten-to-digital converter that turns your notes into a structured digital Rx, ideal for doctors who prefer handwritten Rx.

### AI Care Agent

A virtual receptionist that books appointments, collects symptoms, captures history, and prepares structured summaries before the consultation begins.

### DDx - Differential Diagnosis

AI-powered clinical intelligence offering possible condition suggestions based on symptoms and patterns to support sound medical decisions.

### Patient Engagement Suite

Automated reminders, WhatsApp Rx delivery, and smart follow-ups that keep patients connected and improve clinic adherence effortlessly.

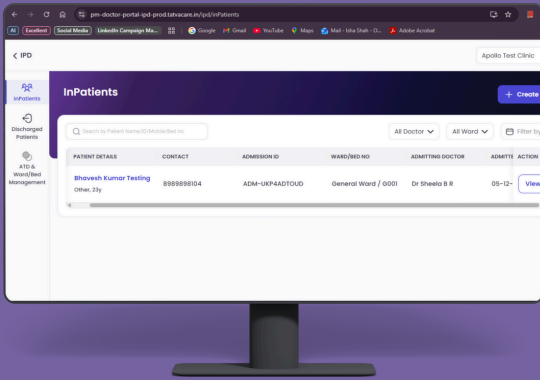

### Practice & Hospital Analytics

A real-time analytics suite that tracks OPD/IPD performance, doctor productivity, patient retention, revenue trends, and prescription insights.

# Outpatient Management That Feels Effortless

-  **Appointments & Queue Management**
  - ✓ Online bookings, walk-ins
  - ✓ Staff scheduling
